□ **May 1-2, 2003**
Milpitas, California

Join industry leaders at the
Display Interfaces 2003 Symposium.

Don't miss the chance to explore the standards and requirements for the next generation of portable, wireless, and advanced digital technologies.

Be a part of the event that leading consumer electronics and personal computer industry professionals turn for the technical information to ensure their companies have the competitive edge.

This year, the event has attracted global pacesetters such as ATI, Intel, IBM, Portrait Displays, Quantum Data, Qualcomm, Samsung, Silicon Image, Tech Source, and Tektronix, among others. The conference will deliver the latest information from the industry's leading developers in sessions like:

- Digital Packet Video Link
- MDDI - low power display interface for portable devices
- **Harmonic video timing**
- High Definition Multimedia Interfaces
- Testing for DVI compliance - Issues and Solutions
- Overview of packet video systems
- More high profile speakers and topics to be announced

Display industry advances are offering consumers more exciting breakthroughs and more compelling new choices than ever before. Get ahead of the curve by joining your colleagues this May in Milpitas.

Be a part of it!

The Video Electronics Standards Association is a worldwide organization with more than 100 member companies, that promotes and develops timely, relevant, open display and display interface standards.

□ **REGISTER TODAY**

\$125 for VESA Members

\$125 for SID Members

\$250 for Non-Members

Each admission includes
luncheon and reception
